

Application No. 10/089,593
Filed: August 6, 2002
TC Art Unit: 1734
Confirmation No.: 2476

AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph on page 3, lines 9-14, as follows:

The conventional hot technique of installing tensioned ceilings gives rise, a priori, to severe difficulties if the ceilings are printed. These difficulties are mentioned in document WO-A-99/~~43906~~-43907 (page 1, lines 25-30): tensioning such sheets after they have been printed can lead to images becoming distorted.
